Steel for the reinforcement of concrete B500B: coils (indented)

PRODUCT SPECIFICATION

General

Steel for the reinforcement of concrete B500B (coils) are in accordance with the requirements of chapter 4 of guideline BRL 0501 and with that of NEN 6008.

The products are meant to be used in constructions of concrete.

Further specification

Classification : B500B

Production method : Cold profiled (indented)

Nominal size : 6 – 7 – 8 – 9 – 10 and 12 mm

Delivery condition : Coils (compact spooled)

Marking

The products are marked with a label with upon it at least on a clear and indelible way:

--the KOMO[®]-logo and the certificate number, figure 1;

--the classification B500B;

--the diameter;

--the rolling mark;

--heatnumber/castnumber/coilnumber;

--name of the certificate holder;

-- BRL 0501.

Place of the label: at least one label per coil.

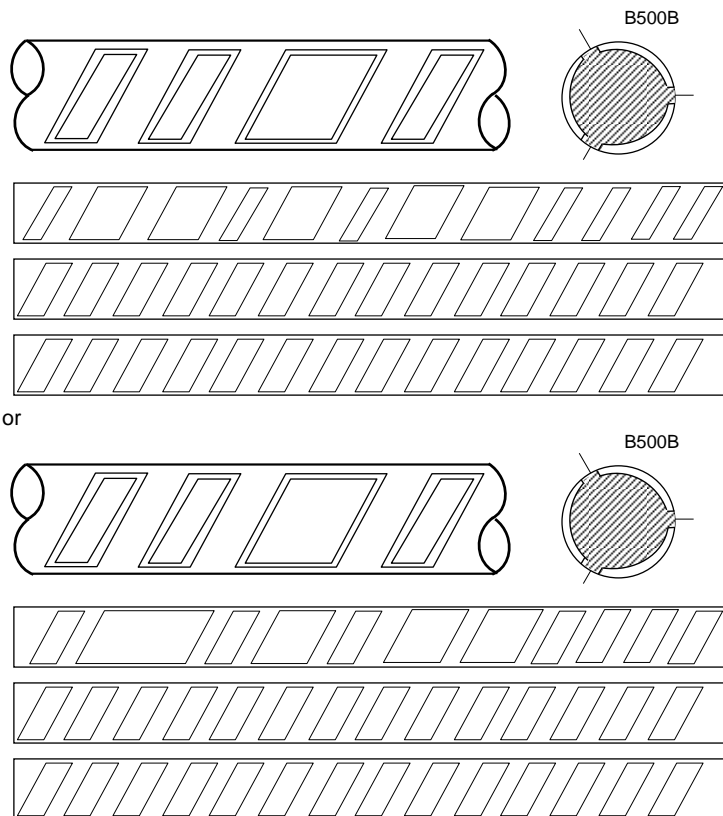

Steel for the reinforcement of concrete is marked on the following way:

On one rib row by ribs between wider indentations between the ribs with the code (02-21), figure 2.

Place of the mark: on a mutual distance of ± 1 meter. The position of the transverse ribs may also be in reverse.

RECOMMENDATIONS FOR USERS

Check at the time of delivery whether:

- the producer has delivered in conformity with the agreement;
- the mark and marking method are correct;
- the products do not show any visible defects due to transport.

If you should reject a product on the basis of the above, please contact:

- Van Merksteijn Steel - Netherlands B.V.
- and if necessary:
- Kiwa Nederland B.V.

Consult the supplier's processing guidelines for the proper storage and transport methods, NEN 6722 and/or NEN-EN 13670.

CONSTRUCTION PRODUCTS REGULATIONS

If a construction product is subject to a European harmonised technical specification, the statements in this KOMO product certificate must not be used as a replacement for the CE marking on such construction product and/or for the associated obligatory Declaration of Performance.
